Orange County Fire Authority We Are Your Fire Department

The City of Aliso Viejo partners with the Orange County Fire Authority (OCFA) for its fire and emergency medical services. The OCFA provides comprehensive emergency services to the residents of Aliso Viejo through a regional approach. Fire services in Aliso Viejo are led by our local Fire Chief, Division Chief Jeff Adams.

Three highly experienced Battalion Chiefs manage the day to day operations in the field. Working on a rotating schedule, Battalion Chiefs Tim Perkins, George Casario, and Mike Contreras respond to emergencies in the city and provide support to education activities and community events.

OCFA is an “all-risk” emergency response provider. While medical and fire emergencies are our primary response, we also respond to a wide range of other emergency incidents including hazardous materials response, floods, water rescues, earthquakes, bomb threats, terrorism and more.

Occasionally, large-scale natural or man-made disasters strike. For those incidents where the fire authority is taxed beyond the norm, a complex system of automatic and mutual aid resources are available from outside fire agencies.

Responding to emergencies is only part of what we do, as we are also proactive in preventing emergencies. Our Community Risk Reduction section works to assess fire and life safety risks and create education and prevention programs to reduce the chances of bad things happening. We want to ensure that all who work, live and play in our communities recognize and actively participate in their safety.

Remember: The public can do more to prevent emergencies than we ever can. Please “watch the water” because drowning happens silently and without warning. OCFA reminds you to never swim alone, ensure you have barriers around your pool and learn CPR. In addition, Southern California lives under the constant threat of wildland fires. If you live near a wildland urban interface area, please ensure you have a defensible space, are using non-combustible materials and have a plan should a fire occur.

We Want To Hear From You
