Job Address: _____

Water Quality Permit Information

Applicability

- Water Quality Permit is required for any job that results in a disturbance of 250 CF or more of soil or hard surface and/or 250 SF of flat work (I.E. pavers, concrete).
- Water Quality Permit is required for any job that requires outside stockpiling and/or processing of dirt or cementitious materials in front of the property.
- Applicant shall complete and submit a Water Quality Inspection Form / Inspection Notification with \$192 Permit Fee.

Inspection

- All projects with Water Quality Permits require a Water Quality Inspection by a City Inspector prior to the start of any construction work.
- To request an inspection, fill out the Water Quality Permit Form / Inspection Notification (blue) and indicate the day and time when the site will be ready for a water quality inspection.

Note: All required pollution prevention Best Management Practices (BMPs) must be in place prior to conducting a Water Quality Inspection

Enforcement

- Failure to comply with the Water Quality Permit requirements will result in a Notice of Non-Compliance, or with a Stop Work Order and may result in the issuance of an Administrative Citation according to the City's Code Enforcement Policy. An Administrative Citation may include the following fine schedule:
 - 1st Offense \$100 per violation
 - 2nd Offense \$200 per violation
 - Subsequent Offenses \$500 – For each additional violation within one year
