ENVIRONMENTAL SERVICES

# ALISO VIEJO RECYCLES

## CR&R's waste collection services for your community.

Our trucks collect your waste and transport it to a Material Recovery Facility (MRF) where all recyclables are pulled from the waste stream.

### STEP 1 COLLECTION

Place waste from your residence into the CR&R dumpster. Please bag your wet waste separately and place in your bin. For large bulky items call CR&R Customer Service and make arrangements for a special collection at no additional charge. A Customer Service Representative will ask you for a specific list of items and schedule collection by a separate truck. This will assure your dumpster is not filled with large items which may create overflow issues.

### STEP 2 MATERIALS RECOVERY FACILITY

Waste is transported to a Material Recovery Facility where CR&R will separate designated recyclable materials through a combination of manual and mechanical sorting systems. The sorted recyclable materials are baled for end-markets while the balance of the mixed waste stream is sent to a disposal facility such as a landfill.

### STEP 3 RECYCLING MARKETS

Recovered recyclables are separated by material type and shipped to recycling markets to be turned into various products.

OR

### LANDFILL

Residue or non-recyclable items are deposited at the landfill.

To help Aliso Viejo meet recycling requirements, please bag your wet waste separately and place in your bin.
